

EXCITINGLY REALISTIC: THE OLYMPUS LEXT METROLOGY SYSTEM.

Every surface harbours exciting secrets. Thanks to Olympus LEXT, they will now all see the light of day: with a unique combination of high-resolution laser scanning and colour light microscopy, the system reveals structures that bring a whole new dimension to your work. Olympus LEXT allows you to gain fascinating insights from your specimens, quickly and without elaborate preparation – and you can rely on their total precision. The newly developed 3-D display renders surfaces in real colours and gives you a completely new view of things. State-of-the-art metrology technology which guarantees significantly more exciting results – discover more with Olympus!
