

## Keywords index

Alumina	35	Metastable austenite	91
Amorphous materials	39	Micro hardness	95
Analysis and design	67	Microstructure	27, 43
Analysis and modelling	55-71	Multi-roller burnishing	95
Applied mechanics	63		
Artificial neural networks	23	Nickel super-alloy	7
		Non-destructive testing	51
<b>Bitubal and monotubal circular specimens</b>	71	Numerical techniques	59, 63, 71
<b>CAD/CAM</b>	71	<b>Oxidation</b>	31
Ceramic preform	35		
CHT – diagram	15	<b>Particle Swarm Optimization</b>	75
Cold working	91	Permeability	35
Composites	23, 35	Plane stress	55
Compression test	27	Plastic anisotropy	67
Crack growth rate	19	Plastic forming	23, 27, 67, 83
Crack opening displacement	19	Properties	47, 51
		Pulse-echo ultrasonics	51
<b>Damage mechanism</b>	55		
Degradation	31	<b>Residual life analysis</b>	63
		Retained austenite	79
<b>ECAP</b>	83	Rubber composites	55
End-milling	75		
Energy absorption	71	<b>Smart materials</b>	19
Energy and power parameters	59	Static solicitation	55
Environmental indicators	99	Steel forgings	87
Environmental management	99	Strength	35
		Stress relaxation	47
<b>FEM</b>	59	Structural phase analysis	7
Finite Element Analysis	55	Superplasticity	83
		Surface roughness	95
<b>Glass/epoxy composites</b>	51	Sustainable production	99
Groove-rolling	59		
		<b>TBC</b>	31
<b>Hardening</b>	47	Tearing energy	55
Heat treatment	7, 87, 91	Technological design	67
Hot working steel	15	Technological process	99
		Temperature measurements	87
<b>Industrial management and organisation</b>	99	Tempering	15
Intermetallic phase $\gamma'$	7	Thermal activation	51
		Thermomechanical processing	79
<b>Machining</b>	75, 95	Thin & thick coatings	31
Magnesium alloys	43, 47, 83	Through-transmission ultrasonics	51
Manufacturing and processing	75-95	Tool materials	15
Manufacturing technology management	23	TRIP-aided steel	79
Martensitic stainless steels	91		
Materials	7-43	<b>X-ray diffraction</b>	43
Mechanical properties	39, 47		
Metallic alloys	7, 27, 31, 39, 43, 79	<b>Yield zone</b>	19
