

Keywords index

Amount of deformation	79	Materials	15-35
Analysis and modelling	51-79	Mechanical properties	27, 35, 39
Asymmetric plate rolling process	63	Metallic alloys	7, 19, 27, 31
Balanced Scorecard	99	Metallography	7
Biomaterials	43	Methodology of research	47
Body dimensions	47	Multi-scale simulation	71
Cattle	47	Muscle activity	43
Computational material science	71, 79	Non-destructive testing	43
Control volume method	75	Numerical techniques	55, 59, 63, 67, 75
Cooling rates	23	Oxidation	31
Corrosion	7	Parameters identification	67
Curvature radius	79	Pearlitic steel	71
Cutting tool	87	Phase analysis	19
Degradation	31	Plastic forming	83
DMTA method	35	Polar graphs	51
Dynamic mechanical properties	83	Process systems design	51
ECAP geometry	79	Production and operations management	99
EMG signal	43	Properties	27, 39, 43
Engineering polymers	35	Quality assessment	95
ERP/MRP	99	Reduction of vibrations	51
Evolutionary algorithms	67	Retained austenite	15
Extrusion speed	39	Rietveld method	19
Extrusion temperature	39	Seam weld	39
Extrusion welds	39	Severe plastic deformation	79
FEM	59, 63	SIROQUANT™	19
Finger flexure movement	43	Steel	23
Float polishing	91	Structural numbers	51
Hardness	23	Surface treatment	91
Hardenability	23	TBC	31
Heat loads of the valves	59	Technological design	7
High-speed steel	15	Technological devices and equipment	47
Industrial management and organisation	95, 99	Tempering	15
Injection moulding	35,83	Thiessen polygons	75
Inverse problems	67	Thin&thick coatings	31
Jominy test	23	Tool life	87
Machinability	87	Tool materials	15
Machining	87	Tool wear	87
Magnetic cluster	91	Transverse weld	39
Magnetic Compound Fluid (MCF)	91	WE54 magnesium alloy	27
Manufacturing and processing	83, 87, 91	Weighing	47
		Welding	7
		Wire drawing	71
