

Keywords index

AFM	159, 163	Magnetic properties	111
Alloying	191	Manufacturing and processing	11, 27, 91, 175-195
Al-Si-Cu	151	Materials	19, 35, 43-95
Aluminium alloys	139	Mechanical properties	35, 51, 115, 63, 87, 131, 99, 139, 191, 195
Amorphous materials	87	Metallic alloys	103, 111
Analysis and modelling	143-171	Metallography 3	5, 83, 103
Application	91	Methodology of research	131-139, 151
Artificial intelligence methods	147, 167, 171	Mixed mode	215
Carbides	191	Moodle	215
Cast defects	151	Multicrystalline silicon	179
Castings	139	Multifractal geometry	159, 163
CCT diagrams	171	Nanomaterials	35, 83, 111
Cemented carbides	95	Nanotechnology	91
Ceramic preforms	183	Neural networks	143, 171
Cleaner production	199	Non-alloyed steel	19
Composites	63, 91, 123, 127, 183	Non-destructive testing	123
Computational material science	159, 163, 171, 219	Oxide ceramics	59, 75
Computer aided teaching	219, 227	Polyazomethine PPI	67
Computer supported education	215	Polymer-polymer composites	43
Corrosion resistance	127	Powder metallurgy	11, 19, 35, 71, 95, 111, 187
Course management system	227	Preparation of metallographic microsections	147
Creep	143	Product life cycle	203
Cutting tools	75, 107	Production planning and control	199
CVD	75, 79	Programming in logic	147
Diode laser	191	Properties	95-127
Distributed artificial intelligence	167	PVD coatings	55, 59, 75, 79, 107, 155, 159, 163
Duplex stainless steel	11	Quality management	203, 211, 223
Dynamic PDF	227	Quality research methods	203
Education and research trends	215-227	Risk assessment	207
E-learning	215, 227	Safety and health management	207
Electrical conductivity	103	Secondary hardness effect	119
Electron microscopy	35, 51	SEM	55, 107
Electronic structure	67	Sinter-hardening	11, 187
Engineering polymers	67, 123	Sintering	11, 47, 71, 95, 187
Expert systems	147	Solar cells	179
Fatigue	123	Stresses	155
Finite Element Method	155	Surface layer	135, 191
Fracture mechanics	99, 131	Surface treatment	27, 179
Fracture properties	43	Technological efficiency	199
Functional materials	83, 103	Technological process	151, 199, 207
Gradient coatings	59	TEM	55, 107
Gradient tool materials	19	Tensile and torsion tests	131
Heat treatment	27, 71, 87, 99, 119, 139, 175	The 5S methodology	211
High speed steels	19, 47, 71	Thermography	123
Holonic manufacturing systems	167	Thin&thick coatings	115, 195
Hot work tool steel	27, 119, 135	Tool Gradient Materials	95
Image analysis	143, 151	Tool materials	47, 55, 71, 75, 79, 107, 119, 135, 175
Industrial management and organisation	203-211	Training simulations	219
Infiltration	183	Tungsten carbide	47
Injection moulding	43	Uniaxial pressing	47
Laboratory simulations	139	UV-Vis absorption spectroscopy	67
Laser melting	27	Wear resistance	175
Laser processing	135, 175, 179	Whiskers	59
Low alloyed steels	187	XPS	59
Magnesium alloys	99, 131	X-ray diffraction method	51, 87, 107
Magnetic materials	63
