

## Keywords index

AISI 321	63	Laser welding	63
Aluminium	15	Leaching	15
Aluminium alloys	19	Linear discrete system	95
Amorphous materials	15, 23	Low alloy cast steel Cr-Mo-V	33
Analysis and modelling	41-55	<b>Manufacturing and processing</b>	59-71
Analytic solution	19	Materials	15-33
Austenite supersaturated	71	Metallic alloys	19, 27, 33
Automation engineering processes	7	Mist	27
<b>Buckling</b>	19	Monte Carlo simulation	49
<b>C:N:H layers</b>	23	<b>Nickel</b>	15
Casting	27, 59, 67	Nitride layer	71
Composite	59	Nitriding	71
Composite materials	41	Numerical techniques	45, 55, 95
Computational material science	41	<b>PA CVD</b>	23
Computer aided teaching	83	Phase analysis	33
Contact stresses	45	Plasticity	19
Cooling	27	Polar graphs	87
Copper	15	Polymeric gradient materials	67
Corona discharge	67	Pressing	67
<b>Degradation after service</b>	33	Process industry	79
Die	27	Process systems design	87
Die life	49	Properties	37
Ductility	37	<b>Quality management</b>	75, 79
<b>Education and research trends</b>	7, 83	Quality tools	79
Elastic constants	41	<b>Reduction of vibrations</b>	87
E-learning	83	Reinforcing particles morphology	59
Engineering polymers	23	Remote supervision of robot	7
ERASMUS	83	Robotics	7
ESMOS	83	<b>Sensitivity analysis</b>	49
Extrusion die	49	Shrink fitting process	45
<b>FFT</b>	95	Simulation	7, 59
Finite Element Method (FEM)	45, 55	Solidification	59
Fracture failure	49	Spectral analysis method	95
Functionally gradient materials	67	S-phase	71
<b>Groove-rolling</b>	55	Structural numbers	87
<b>Hot ductility curves</b>	37	Students' mobility	83
HPDL	63	<b>Thermo-chemical treatment</b>	71
I-ERASMUS	83	Tribology	23
Instability	19	True flow curves	37
<b>Laminated plates</b>	41	<b>Welding</b>	63
