

## Author index

Balic J.	73	Lee U.	65
Białas K.	18	Mursec B.	81
Bociąga E.	26	Oloyede A.	11
Brajlih T.	73	Pawlak Z.	11
Brus M.	81	Pietrzak M.	26
Buchacz A.	33, 41	Postawa P.	26
Cus F.	81	Rauckyte T.	11
Drstvensek I.	73	Reclik D.	89
Dymarek A.	49	Świder J.	89
Dzitkowski T.	49	Topolska A.	97
Jamroziak K.	57	Valentan B.	73
Janzekovic M.	81	Vindis P.	81
Kost G.	89		
Kwon K.	65		

## Keywords index

Amorphous materials	11	Oil and grease	11
Analysis and modelling	18-73	Physical properties	11
Applied mechanics	33, 41, 65	Piezotransducer	41
Approximate method	33	Polar graphs	18, 49
Automation engineering processes	89	Process systems design	18
Axially moving plate	65	Productivity and performance management	26
Bar	41	Profibus DP	89
Composites	57	Robots mechatronics	89
Computational mechanics	57	Shape complexity	73
Computer Aided Teaching	97	Sowing machines	81
Constructional design	49	Spectral element model	65
Dynamic flexibility	49	Statistic methods	26
Education and research trends	97	STL file	73
E-learning	97	STL file parameters	73
Engineering design	73	Structural numbers	18, 49
Engineering polymers	26	Synthesis	18
Flexibility	33	Technological devices and equipment	81, 89
Galerkin's method	41	Thermal loading	65
Handling and disposal	11	Torsionally vibrating shaft	33
Impact	57	Transmittance	41
Impact load	57	Used oils	11
Inter - row distance	81	Variability parameters	26
Manufacturing and processing	81, 89	Vibration	65
Materials	11	Working speed	81
