

Keywords index

Al structure	23	Materials	7-39
Al-Si-Cu	23	Mechanical properties	31, 79, 87
Aluminium	95	Metallic alloys	15, 23, 27, 31
Aluminium sheet metal	83	Methodology of research	51
Analysis and modelling	55-71	Microstructure	15, 27, 31
		Monte Carlo	59
Barium ferrite	51	Nanocomposites	35
Barkhausen method	47	Nanofibers	35
BBC2003	63	Nanomaterials	35
Bone	71	Non-conventional injection moulding	19
Cannon	59	Non-destructive testing	43, 47
Carbon coatings	35	Numerical analysis	63
Casting	95	Numerical techniques	59, 71
Composites	99	Pedestrian safety	67
Compression test	27	Plasma nitriding	87
Conductometry	43	Plastic forming	27, 91
Corrosion	15	Polycarbonate	19
Crack	59	Polymer composite	7
Degradation	7	Polymeric Gradient Materials (PGMs)	39
Dental implant	71	Polypropylene	19
Design methodology	67	Powder metallurgy	99
Diagnostics	7	Pressure infiltration	99
Eddy currents	43	Properties	43,47
Electrical and tribological properties	39	Pulse MIG (Metal Inert Gas) welding	83
Electromagnetic field	95	Rapid prototyping	55
Engineering design	55, 91	Residual stress	47
Engineering polymers	19	Reverse engineering	55
Fatigue	59	R-VSM	51
FEM	71, 91	SCORIM	19
Flaw detection	43	Simulation methodology	67
GA	63	Slitting passes	91
Gravity casting	39	Stochastic optimization	63
Heat transfer	7	Strip slitting	91
High-energy ball milling	51	Surface reconstruction	55
Impactors' modelling	67	Surface treatment	75
Inoculation	95	Thermovision	7
Life	59	Thick-walled	59
Manufacturing and processing	75-99	Thin&thick coatings	79, 87
Maraging steels	31	Wear resistance	87
		Welding	75, 83
		X-ray phase analysis	51
