

Keywords index

Accreditation body	203	Machining	139
Accredited laboratory	203	Magnesium alloy	179
Aluminium alloy	187	Manufacturing and processing	115, 179-199
AM50 alloy	131	Master alloys	199
Analysis and modelling	159-175	Materials	123, 131, 139
Applied mechanics	159	Metallic alloys	143
Beam	159	Metallography	143
Casting	115, 131	Microstructure of welded joints	191
Composites	171	Mn addition	199
Computational material science and mechanics	175	Nonlinear dynamic finite element	167
Computational mechanics	167, 171	Piezotransducer	159
Design of experiment (DOE)	175	Powder metallurgy	199
Disk laser	187	Properties	143, 151
Dynamical characteristic	159	Retained austenite	123
ECAP	151	Semi-solid alloys	115
Electrical conductivity	143	Solidification	131
Finite element method (FEM)	175	Standardising laboratory	203
Functional materials	143	Statistic method	175
Galerkin's method	159	Steel AISI 316	151
High Power Diode Laser (HPDL)	179	Structure	151
High-speed steel	123	Surface roughness	139
Impact	171	Technology devices and equipment	139
Impact load	171	Tempering	123
Incompatibilities analyses	203	Testing of welded joints	191
Industrial management and organisation	203	Thermal analysis	131
Laser alloying	179	Thixoability	115
Laser welding	187	Thixoforming	115
Low-cycle fatigue	151	Titanium carbide	179
		Tool materials	123
		Total plastic work	167
		Tungsten carbide	179
		Welding	187, 191
		Wheel impact test	167
