

## Keywords index

Analysis and modelling	47-70	Intergranular fracture	19
Antiwear additives	35	Intermetallic phases	78
Applied mechanics	47, 53	Inverse Stefan Problems	70
Approximate and exact methods	47		
Arc-PVD	86	Laminates with holes	41
Austenite and $\alpha'$ - martensite phases	19	Laser	78
Austenitic stainless chromium-nickel steel	19		
		Manufacturing and processing	78, 86
CAD/CAM	62	Materials	7-27, 62
Cold rolling	19	Mechanical properties	27
Composites	78	Metallic alloys	7, 19, 53
Computational material science and mechanics	53	Metallography	7, 62
Constructional design	62	Methodology of research	41
Continuous system	47	Microstructure	86
Cr(N,C) coatings	86		
		Notch strength	41
Data mining	94		
Drilling test	86	Plastic deformation	19
		Productivity and performance management	94
EDS	86	Project analysis	94
Engineering polymers	27	Project management	94
Erp	94	Properties	35
External pressure	35		
		Scratch-test	86
Fatigue	53	Solidification	70
Flexible coordination number	35	Spectroscopy	35
Functional materials	7	Structure and mechanical properties	19
		Swagelining	27
Genetic algorithm	70		
		Tikhonov regularization	70
Hardness	35	Transition metals	35
Heat treatment	7	Trenchless renovation	27
Industrial management and organisation	94	Vibrating shaft	47
Influence of geometry	41		
Intelligent Decision Support System	94	Wear	86
