

## Keywords index

<b>AFM microscopy</b>	41	<b>Metallic alloys</b>	18
Analysis and modelling	57-71	Mistake proofing	95
ANFIS-Ants technique	79	Non-destructive testing	49
Carbon fibre content	49	<b>Open-architecture control</b>	57
Case Based Reasoning	7	<b>PDCA cycle</b>	95
Coatings PVD	71	Plasma assisted nitriding	25
Cold working	18	Poka-Yoke method	95
Comparative analysis	65	Powder metallurgy	33, 87
Composites	87	Properties	25-49
Computational materials science	71	<b>Quality management</b>	95
Conjugated polymer	41	<b>Rubber composites</b>	65
Controller	57	<b>SEM</b>	33
Crack resistance	25	Sintering	87
<b>Damage mechanism</b>	65	Stresses	71
<b>FGM</b>	33, 71	<b>Texture and microstructure</b>	18
Finite Element Method	71	Thermal analysis – Universal Metallurgical Simulator	
Finite elements model	65	and Analyzer (UMSA) and AITAP Technology Platforms	7
<b>High alloy steels</b>	18	Thermal diffusivity	49
Hydrogen embrittlement	25	Tool materials	33
<b>Industrial management and organisation</b>	95	Transient thermography	49
Industrial networks	57	Turning optimization	79
<b>LCVD</b>	41	<b>UV-Vis spectroscopy</b>	41
<b>Machining</b>	79	<b>W319 aluminum alloy</b>	7
Manufacturing and processing	79, 87		
Materials	7, 18
