

Keywords index

AISI 316	175	Micro forming	115
Amorphous materials	123	Modelling	195
Analysis and modelling	138-155	Nitriding	175
Applied mechanics	138	Nitrocarburizing	175
Artificial intelligence methods	149	Observer/kalman filter identification	138
Bulk metallic glasses	123	Pipeline production	160
Casting	149, 180	Plasma	175
Cellular material	180	Plastic forming	115
Composites	180	Properties	149
Computer simulation	155	Quality assessment	160
Development in the field of materials	203	Quenching and tempering	155
Education and research trends	203	Rapid solidification	115
Engineering design	138	Roller burnishing	188
FMEA	160	Smoothing	188
Foresight	203	Stainless steel	175
Full-car model	138	Statistical process control	149
Glass-forming ability	123	Strengthening	195
Heat treatment	155	Superalloy padding welds	131
Loose solid balls	195	Surface engineering	203
Machining	188	Surface roughness	188
Magnesium alloys	167	Surface treatment	195
Manufacturing and mechanical engineering	203	Temperature distribution in the weld	131
Manufacturing and processing	149	Thermal and magnetic properties	123
Manufacturing and processing	160-195	Thermal treatment	167
Materials	115, 123	Thermovision analysis	131
Mechanical properties	155, 167	Thixoforming	180
Melt spinning	115	Toughness	155
Metallic alloys	115	Wear	175
Metallurgy	149	Welding thermal cycle	131
Methodology of research	131	Yield strength	155
