

Keywords index

Adhesion coefficient	634	Geo energy	790
Aluminum alloy	7050 651	Grain refinement	507
Analysis and modelling	644-702	Graphs	644
Applied mechanics	644	Grey-box	692
Artificial intelligence methods	734	H eat flow	657
Artificial neural network	651	Heat treatment	597
Audit	774	High-manganese steel	507
B iocompatibility	603	Hot-work steels	750
Biomaterials	542	Hot-working	507
Bone cement modification	533	HVOF coating	586
Burr formation in drilling	734	I mage segmentation	743
C AD/CAM	577	Implant	533, 542
Cast steel	597	Inductive algorithms	743
Cemented carbides	711	Industrial management and organisation	750, 774
Coating materials	634	Integration	782
Composites	577	Intermetallic; Ni-Al phases	586
Computational welding	667	ISO 9001	774
Computer simulation	597, 684	L aser surface treatment	750
Corrosion mechanism	586	M achining	734
Corrosion resistance	586	Magnesium alloys	613
Coupled thermo-mechanical problem	667	Magnetic properties	527
D ata-driven model	676, 692	Magnetostrictive composites materials	527
Defects	657	Manufacturing and processing	711-750
Denture	542	Materials	507-542
Design For Six Sigma	676	Materials design	577
Development	782	Materials Science and Engineering	782
Diagnostics	734	Mechanical alloying	711
Diamond nanoparticles	603	Mechanical properties	542, 552, 577, 597, 613
Dynamic recrystallization	507	Methodology of research	613, 634
E co-friendly product	608	Microhardness	684
Education and research trends	782	Microstructure assessment	533
Elastic properties	634	Monofilament	702
Engineering design	577	Multiagent systems	743
Evolutionary optimization	667	N on-woven fabrics	702
Exact and Galerkin's methods	644	Numerical techniques	684
F EM analysis	533	O rganic cotton	608
Finite difference method	657	P een forming	651, 743
Finite element calculation	667	Point of view	782
Finite Element Method	684	Powder Metallurgy	711
First-principle model	676, 692	Process	774
Foresight	750	Properties	552-608
Free vibrations	634	PVD and CVD coatings	552
G enetic algorithms	657		

Quality Management Systems	774	Stress-strain curve	702
		System power plants	790
Reactive nitrogen species	603	Td_{0.3}Dy_{0.7}Fe_{1.9}	527
Reactive oxygen species	603	Technology roadmapping	750
Relaxation	702	Thermal treatment	613
Renewable source of energy	790	Tool materials	552
Research trends	782	TRIP/TWIP steels	507
Rheological model	702		
Ring spinning	608	Ultrasonic washing	608
		Vibrating clamped – free beam	644
Servo-hydraulic system	692	Working properties of materials and products	552
Smart materials	527	Young's modulus	634
Static recrystallization	507		
Steel	597		
Stresses	684
