

Dear Readers,

Today in the pictures there is Wrocław in Poland. There are two important reasons. On 1st July 2011 Poland will take over the Presidency of the European Union, and Wrocław will become one of its capitals, because several meetings with Ministers of the European Union are foreseen. The city, beautifully situated on the river, has been preparing for these events, as well as for the Euro 2012 football championships to be held next year. In May 2011 the 19th International Scientific Conference on Achievements in Mechanical and Materials Engineering is organized by the World Academy of Materials and Manufacturing Engineering there. In the picture the Gothic City Hall in the Main Market, the Leopoldina Room of the University of Wrocław and other views from that one of the largest cities, the seat of modern industry, science and culture in Poland.

Handing over the next issue I wish an interesting reading, and as usual encourage PT authors to prepare their work for publication in next issues.

Gliwice, in April 2011
