

Keywords index

Aluminum alloys	115	Metallic alloys	157
Amorphous alloys	166	Microalloyed steels	149
Analysis and modelling	185-195	Microscopy	157
Baseline	115	Modification of non-metallic inclusions	149
Cast steel	137	MSA	205
Ceramics and glasses	157	Nanomagnets	166
Chemical composition	137	Optimization of system	205
Corrosion	157	Plasma sprayed	177
Cr ₃ C ₂ and WC carbide coatings	177	Process systems design	185
Design for Six Sigma	205	Properties	157-177
DOE	205	Rare-earth elements	149
Drilling	195	Reduction of vibrations	185
Electron	157	Relaxed amorphous phase	166
Expert systems	195	Research monographs	115
First Time Through	205	Special purpose machines	195
Fraction solid	115	Surface treatment	157
High velocity oxy-fuel technique	177	Synthesis	185
Industrial management and organisation	205	Thermal analysis	115
Machining	195	Thin and thick coatings	157
Magnetic permeability	166	Tool materials	137
Magnetoimpedance effect	166	Tribological properties	137
Materials	137-149	Wear resistant coats	177
