

Keywords index

| | | | |
|--|-------|------------------------------|--------|
| Acceleration of charged particles | 87 | Material creep | 97 |
| Ag-Sb-Sn system | 41 | Materials | 7-14 |
| Al ₂ O ₃ -ZrO ₂ nano ceramics | 58 | Mechanical properties | 29, 35 |
| Analysis and modelling | 64-97 | Microwave sintering | 29 |
| Austenitic stainless steel | 52 | Modelling | 64 |
| Calculation model | 97 | Nanoparticles | 24 |
| Chirping | 87 | Numerical methods | 97 |
| Clusters | 64 | Optimization | 64 |
| Composites | 52 | Optoelectronics | 14 |
| Compression strength | 52 | Organic materials | 14 |
| Deep drawing | 64 | Parametric study | 64 |
| Electrical properties | 35 | Photoalignment | 7 |
| Electrochromism | 14 | Pipeline durability | 97 |
| Engineering polymers | 7 | Plasticity | 64 |
| Equilibrium saturation | 41 | Properties | 24-58 |
| Explicit method | 64 | Relativistic dynamics | 87 |
| FEM | 64 | SEM image | 58 |
| Fluorescence | 24 | Silicon nitride | 35 |
| Free sintering | 29 | Sintering | 52 |
| Friction | 64 | Sol-gel method | 24 |
| Friction coefficient | 52 | Spark plasma sintering | 29, 35 |
| Hardness | 52 | Stress relaxation | 97 |
| Indentation fracture toughness | 58 | Surface treatment | 7 |
| Laser | 87 | TiB₂ | 52 |
| Liquid alloys | 41 | Ultra-pure alumina | 29 |
| Maser | 87 | Vickers hardness | 58 |
