

Dear Readers,

In the first half of May 2012 in the Technical University of Liberec in Liberec, Czech Republic plans to meet professors from several European Union countries and Vietnam concerning the development of possibilities of international cooperation in the field of materials science and nanotechnology.

The Technical University of Liberec is a public university in Liberec, Czech Republic. Its roots lie in the Technical College of Mechanical Engineering, which was founded in 1953. The college was promoted to a university and took its current name in 1995. Liberec is a city in the Czech Republic located on the Lusatian Neisse and surrounded by the Jizera Mountains and Ještěd-Kozákov Ridge. It is the fifth-largest city in the Czech Republic. It was settled by German and Flemish migrants since the 14th century. Liberec was once home to a thriving textile industry and hence nicknamed the "Manchester of Bohemia". The city developed rapidly at the end of the 19th century and as a result has a spectacular collection of late 19th century buildings, including the town hall and the opera house, shown on the cover.

As always, we wish the readers interesting reading of the next Issue of Journal of Achievements in Materials and Manufacturing Engineering

Gliwice in April 2011
