

Keywords index

Aluminium alloys	110	Manufacturing and processing	103-128
Analysis and modelling	16, 75-93	Materials	7, 25-49
Applied mechanics	75	Mechanical properties	49, 110
Artificial intelligence methods	93	Metallic alloys	25, 39
Bromine corrosion	58	Microstructure	110
Cast iron	120	Modelling	93
Casting	120	Nanoparticles	25
Cellular material	7	Nanostructure	49
Composites	7	Power	128
Computational material science	83	Properties	58, 67
Copper microcomposites	49	PVD	103
Corrosion in boilers co-firing biomass	58	Relative contribution	16
Corrosion of heating surface	58	Rheocasting	110
Creep	67	Simulation	93
Degradation	67	Surface roughness	128
Dispersion hardening	49	Steel 14MoV6-3	67
Electromagnetic field	120	Steels	93
Exact and approximate methods	75	Structure	67
Experimental design	128	Structure stability	49
Finite Element Modelling (FEM)	16, 83	T5 and T6 heat treatment	110
Firmness	16	Technology e-Foresight	103
Graphite	120	Technology roadmapping	103
Graphs and hypergraphs	75	Thin & thick coatings	103
Hardness	67	Thixocasting	110
Internal stresses	83	Thixoforming	7
Laser (CO₂) cutting	128	Toughness and rupture force	16
Localized magnetic moments	25	Transition layers	83
Low density composites	7	Vibrating subsystem of mechatronic system	75
Magnetic materials	25	Welding	39
		Welding joints properties	39
