

Keywords index

Analysis and modelling	11, 43-59	Machining	75
Applied mechanics	59	Management system	87
Automation engineering processes	67	Manufacturing and processing	67, 75
Averaging Quality Rating method	79	Metallic alloys	19, 27, 35
CAD/CAM	95	Microstructure	35, 75
Cannon	11	Monte Carlo	11
Computational mechanics	59	Numerical techniques	59, 67
Crack	11	Pedestrian safety	51
Cutting force	75	Polar graphs	43
Design methodology	51	Process	87
Dynamic recovery	27	Process systems design	43
Dynamic recrystallization	27	Product modernity	79
Electron microscopy	35	Properties	19-35
Energy quanta power spectra	75	Quality control	87
Engineering design	67	Quality management	79, 87
Fatigue	11, 19	Rapid prototyping	67
Fracture mechanics	35	Reduction of vibrations	43
Grinding processes	95	Relational database	95
Heat treatment	19	Search system	95
Hot-compression test	27	Simulation methodology	51
Impactors' modelling	51	Static recrystallization	27
Industrial management and organisation	79, 87	Structural numbers	43
Intermetallic phases	35	Structure	19
Life	11	Temperature in cutting zone	75
		Thick-walled	11
		Transportation effect	59
		TRIP-steel	27
