

Keywords index

Amorphous materials	140	Manufacturing and processing	198
Analysis and modelling	168	Materials	115-154
Applied mechanics	168	Metallic alloys	148, 154
Approximate-Galerkin's method	168	Metallic glasses	140
Austenitic steel	148	Microanalysis	154
Automation	187	Moodle	205
CAO	187	Optimization methods	161
cBN composites	198	Overhaul	187
Computer aided teaching	205	 	
Curing	161	Physical properties	154
 		Plastic deformation	148
Data Driven model	179	Properties	161
Disassembly	187	PVD	115
Education and research trends	205	Rapid e-learning	205
Elastomeric composites	161	Refurbishing	187
E-learning	205	Replacement	187
Finite Element Method	115	Servo-hydraulic system	179
First-Principle model	179	Simulation	161
 		Soft magnetic properties	140
Gradient coatings	115	Structure and mechanical properties	148
Graphs	168	 	
Grey-box	179	Thermal stability	140
 		Tool materials	115, 198
High-energy milling	154	 	
HPHT		Vibrating mechatronic system	168
Hydrogen storage materials	154	Vulcanization	161
Induced martensite	148	X-ray phase analysis	154
